SUDAN CERTIFICATE

Pharmaceutical Manufacturing Capabilities -

Vitaegiss Wellness Private Limited specializes in the production of user-friendly oral dosage forms. As such, we have an excellent track record in handling moisture-sensitive products – and our GMP manufacturing facilities and production lines are designed for that.

We manufacture according to

- GMP (Good Manufacturing Practices) for medicinal products
- International standards for food safety such as HACCP (Hazard Analysis Critical Control Point) and US-CFR (Code of Federal Regulations)

Our standards are regularly verified through audits and inspections conducted by customers and international authorities.

Crucial to the production of our effervescent tablets and effervescent instant drinks, as well as some chewable tablets, are intermediate granulates that resist humidity and protect sensitive APIs against acids and bases. We have developed unique technology to optimize our granulates to work well with specific APIs. This makes our products more stable and less sensitive to moisture, especially when compared to conventionally manufactured effervescent products.

It's this combination of technology and expertise that allows us to develop superior products for our customers, giving them a competitive advantage in the markets they operate.

Our specialist GMP manufacturing facility

Our manufacturing plant are automated ensuring fast throughput and inline packaging, minimizing the exposure of products to environmental conditions during the production process.

Our pharma manufacturing plants specialize in:

- Weighing and blending
- Granulation technologies
- Coating technologies
- Filling, tablet compression and packaging
- Quality assurance and control

Manufacturing Facility -

Vitaegiss has been producing medicinal products, food/dietary supplements since February 2022. We have a manufacturing facility based in Sanand GIDC, Ahmedabad.

Annual Capacity -

CDMO & FULL-SERVICE PROVIDER

Vitaegiss Wellness is a manufacturer and a leading Indian provider of high-quality food supplements, marketed under its proprietary brands. The company has been committed to helping people stay healthy. We passionately believe in providing the most convenient and pleasant experience for consumers, and are renowned experts in making medicines easy to take.

Vitaegiss Wellness has a vast experience in developing and manufacturing user-friendly oral dosage forms – including effervescent, orally disintegrating granules and chewable tablets. We work with healthcare companies around the globe to expand their product lines and grow their brands.

USER-FRIENDLY PACKAGING OPTIONS

We have a range of easy-open packaging solutions that ensure our user-friendly dosage forms are safe and accessible for patients and consumers. Our easy-to-open tubes, for example, can be removed with a short rip of the safety ring, and easily lifted off thanks to an ergonomic finger mold grip.

Of course, the design features that make packaging accessible for particular groups, such as the elderly, must be carefully balanced with appropriate child-resistant mechanisms, tamper-proof devices, and other safety elements. Therefore, at Vitaegiss we offer a range of solutions to ensure every product meets its specific requirements.

For user-friendly dosage forms, our state-of-the-art equipment offers the following primary packaging options:

| Effervescent Tablets | Chewable Tablets | Tablets | Capsules | Instant Drinks | Orally Disintegrating Granules |
|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
|  |  |  |  |  |  |
|  | |  |  |  |  |
| POLYPROPYLENE TUBES | | FOIL STRIP PACK | | PET FOIL | |
| FOIL STRIP PACK | ALU ALU BLISTER/ALU PVC BLISTER PACK | | | PAPER ALUMINIUM FOIL | |

We also consider the requirements of manufacturers, pharmacies, and retailers when developing our primary and secondary packaging. By employing design innovations, such as cardboard shelf-ready packaging (SRP), we can ensure products remain visible on the shelf and are easy for retailers to handle.
